

POST-BREXIT CLOUD STRATEGY

01 AN EVOLVING CLOUD LANDSCAPE

85% of businesses have adopted a hybrid Cloud strategy.

50/50 split across public and private Cloud.

70% of IT expenditure originates outside the IT department.

With an increasing number of organisations planning to migrate services to the Cloud over the next five years, it is worth considering what, if any, impact the changing political and legislative landscape in Europe will have on your evolving Cloud strategy.

02 DATA MANAGEMENT

Just because your service provider is based in the UK, it doesn't mean your data stays at home...

TIP: 'Audit your data flows. Find out what data exists, where it is stored, and how it is managed through its lifecycle.'

03 TALENT MANAGEMENT

Changes in immigration policy may impact on your ability to attract and retain IT talent.

TIP: 'Identify skills that may be at risk. Define those that you need to keep in house and those you would be happy to outsource!'

04 DATA PROTECTION LEGISLATION

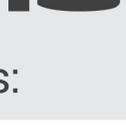

About the GDPR.

WHAT'S COVERED? Name, address, email, phone, IP address.

WHO'S EFFECTED? All controllers and processors of data.

DATA SOVEREIGNTY Data must be kept within the EU.

YOUR RIGHTS Inform, access, amend, control, erase.

Obligations:

- ✓ Privacy by design
- ✓ Minimise the risk of a breach
- ✓ 72 hour mandatory breach notification
- ✓ €20 million penalty

05 PREPARING FOR CHANGE

It's never too early to put a plan in place.

06 CLOUD EXIT STRATEGY

When it comes to developing your hybrid strategy, make sure you have defined exactly what you need from each service and identify which Cloud is most suitable. Here is a checklist of things to consider.

And finally... check the exit conditions.

EXIT

- DATA RETRIEVAL COSTS
- NOTICE PERIODS
- TECHNOLOGY LOCK-IN
- SKILLS REQUIREMENT
